Grille Types

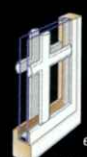

For easy cleaning, Andersen® Finelight® grilles are factory installed between the panes of glass. They match the window's exterior color.

Removable interior grilles let you combine the beauty of wood with easy cleaning.

Removable interior grilles can be combined with permanently applied exterior grilles for a more authentic look.

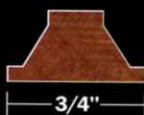

Permanently applied grilles give your windows rich wood accents inside, along with color-matched exterior profiles that are virtually maintenance-free.

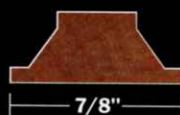

Permanently applied grilles can be combined with a spacer between the glass to recreate the traditional look of muntin bars.

TruScene™ insect screens

With over 50% more clarity than our conventional insect screens, TruScene insect screens let more fresh air and sunlight in, while keeping even the smallest insects out. TruScene insect screens from Andersen – they're like nothing you've ever seen. For double-hung and gliding windows, their frames match the window's exteriors. For casement and awning windows, insect screen frames are available in white and stone. TruScene insect screens for casement and awning windows are also available with natural pine interiors.

TruScene™
Insect screen

Conventional
Insect Screen

Andersen offers both TruScene™ and conventional insect screens for all 400 Series venting windows.

Two clear new reasons to choose Andersen 400 Series windows.

High-Performance™ Low-E4™ glass

High-Performance™ Low-E4™ glass features an invisible titanium dioxide (TiO₂) coating on the glass exterior, which makes cleaning easier. When this coating is activated by sunlight, dirt loosens from the glass and can be washed away by rain. It also makes the glass dry faster with up to 99% fewer water spots.*

High-Performance Low-E4 glass delivers the UV protection, noise reduction and energy efficiency that makes Andersen windows the favorite of builders and homeowners alike.

Best of all, High-Performance Low-E4 glass comes standard in all Andersen® 400 Series windows.

For more details, log on to andersenwindows.com/LowE4

Reduces water spots up to 99%*

LOW-E4 GLASS

* When activated by sunlight. Exterior glass only.

Filters UV Rays

Reduces Sound Penetration

Cuts Energy Bills Up To 25%**

** A study of identical homes comparing Low-E to ordinary dual-pane glass showed a 25% savings on cooling bills, 10% on heating. Savings may vary geographically.
