Premium Siding

BY ALCOA HOME EXTERIORS

Tornado-Tough Nail Hem

QUEST³ features a double thick nail hem that's folded over on itself to provide greater stability and a stronger anchoring surface. As a result, the panel mounts so securely to the wall that it achieves maximum wind resistance, capable of withstanding 190 mph winds.

Tri-Linear Rigidity®

The advanced profile design of QUEST³ provides extra rigidity in three critical areas. With 3/4" lap, a 3/4" return and an oversized locking system, it stays straight and true with 200% more rigidity than standard siding.

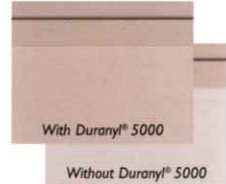

Exclusive T³Lok® System

Mastic's newest, most secure panel lock system is a heavier version of the revolutionary T-lok® design introduced by Mastic T-lok® Barkwood® siding. Made with wider, stronger, more positive locking action, T³Lok is the choice for superior, whole house integrity.

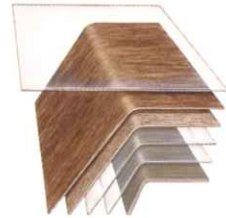

Duranyl® 5000 Protection System

Mastic's exclusive Duranyl® 5000 protection system – a proprietary technology that provides unequalled defense of our richer colors, even in the harshest climates.

Kynar 500® Bonding Process

QUEST³'s unique bonding process marries multiple layers of cedar graining and shading with Kynar 500, the tough clear coat film finish, for remarkable texture and enduring color.

V.I.P. Warranty

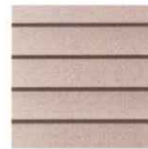

There's more behind the Mastic brand. QUEST³ is backed by Alcoa Home Exterior, a name that inspires confidence. You'll get worry-free performance, long-lasting value, and beauty from an industry leader.
